Dear Barbara:

We in CA Education have used the services of Sealund & Associates to support both our development of instructor lead training (ILT) and asynchronous training (CBT/WBT).

I cannot say enough about the terrific job you and your team have done for us in our training development effort. You supplied us very knowledgeable and skilled instructional designers and technical writers, who added real value to the ILT courseware they developed. As they say, "the proof of the pudding is in the eating." The courses that Sealund & Associates developed are very highly praised by our clients.

You have also supported our asynchronous training development endeavors with well-designed CBT/WBTs. As with the ILT offering you developed for us, the CBT/WBT courses are very highly regarded by our clients.

It is obvious that not only do you and your team understand how to produce quality training, you also care very deeply that students learn. You are true professionals. The bottom line is: we have always been pleased with the results you have given us and I highly recommend your services.

Sincerely,

Edward Kirkpatrick
