Sealund Team with Connie Stevens!

DID YOU KNOW that the great actress and star Connie Stevens has an entire line of beauty products? You may have seen her on the Home Shopping Network.

But did you also know that Connie Stevens uses sophisticated computer systems to ensure that the orders for her products are taken accurately from the moment a customer calls until the product is delivered on their doorstep? Connie Stevens utilizes Sealund's IBM AS/400 and IMA's Telemar software.

"You and your staff have always been very helpful and I wish you all the very best, both personally and professionally."

Sealund Systems

Sealund's talented systems integration team has custom-designed the software to enhance the way in which Connie Stevens' sales consultants handle their customers. "It's much easier to be professional and personal with Connie's fans when the computer brings up the history of the account, what the customer likes is what specials I can offer" says Gary, one of the sales consultants in Connie's office.

Sealund Service

Sealund has been a big help to me in working with my immediate needs, introducing software systems implementation, integration and training of my telemarketing team and allowing me to house the team in their building. I'm impressed with their efficiency, professionalism, flexibility and honesty," states Stevens.

Sealund & Stevens

We applaud Connie Stevens' operation. "I knew Connie Stevens as a movie star – now I see her as a dynamic business woman offering wonderful products to people like you and me," states Barbara Sealund.
