# DTCC

Online Guided/Unguided Simulations

[www.dtcc.com](http://www.dtcc.com)

The collage displays three screenshots from the DTCC training simulation software. The top-left screenshot shows a terminal window with instructions: '1. Type: "84110AFT2" (CUSIP eld)' and '2. Press: Enter key'. It also features a 'Case Study' icon and a date '02/23/04'. The top-right screenshot is titled 'Settlement' and contains a 'Case Study - Settlement: Intercepts - Processing Funds Intercepts' scenario. The bottom screenshot is titled 'International' and contains a 'Case Study - International: Prepare Folder - Identify an Initial Distribution' scenario.

## Sealund Creates Guided and Unguided Case Study/Simulations for DTCC

Sealund partnered with DTCC to build numerous Guided and Unguided Case Study/Simulations as part of their recent training initiative.

A total of **120 Case Study/Simulations were created** to emulate DTCC's financial

computer systems, which were either Mainframe or Browser-Based. The Case Study/Simulations replicated a series of tasks that employees would perform while on the job.

## Clearance

Sealund designed customized branding for each curriculum.

## International

## Announcements

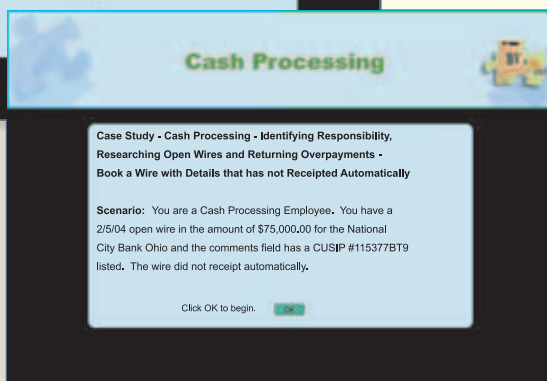

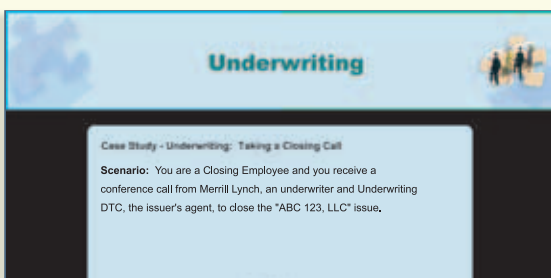

## Cash Processing

The Guided and Unguided Case Study/Simulations start off with a scenario that provides the employee with pertinent information regarding the task(s) that need to be completed. The Guided Case Study/Simulations give step by step instructions that walk the employee through their job related

task(s). The Unguided Case Study/Simulations do not provide any instructions. The employee must apply the knowledge and skill gained from the Guided Case Study/Simulations as well as the other training materials in order to complete the required task(s).

# SCORM

Sharable Content Object Reference Model

The Unguided Case Study/Simulations were created to adhere to the **Sharable Content Object Reference Model** compliance standards. SCORM is a group of technical standards that allow web-based learning systems to find, import, share, reuse and export learning content in a standardized way. Utilizing these standards allow for the successful integration with the client's internal Learning Management System.
