## Sealund Creates Asset Services Training Program for DTCC

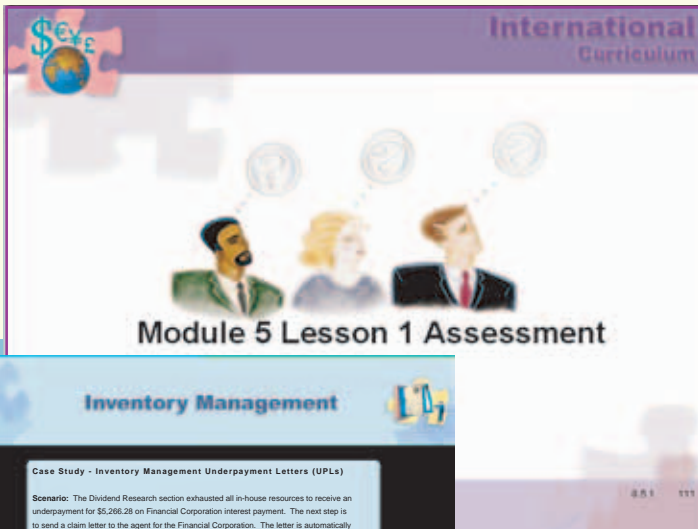

A recent training initiative involving DTCC, a prominent financial institution, harnessed all of Sealund's areas of expertise in the creation of the Asset Services training program. Sealund conducted a needs analysis and determined the appropriate course of action for the successful production and implementation of training for new and current employees.

Sealund's instructional design team worked in collaboration with DTCC Subject Matter Experts to create training materials for several departments within Asset Services. A blended curriculum plan was developed to support DTCC's need for a "Blended Learning Experience" providing a cross-media approach to the instructor-led materials, online simulations and e-Learning course content.

### Sealund Special Report

Contact Sealund at 1-800-434-8000 for more information  
[consultants@sealund.com](mailto:consultants@sealund.com) • [www.sealund.com](http://www.sealund.com)

Sealund worked closely with DTCC's Subject Matter Experts to produce an Instructor-Led Training program that included over 14,000 Power Point slides, 120 Case Study Simulations, Source Books, Facilitator Keys and Assessment Questions. In addition, the Case Study/Simulations as well as the Assessment Questions have the ability to be tracked and scored.

Even though the training solution was ILT based, it was also created to be used as an individualized self-study tool.

### *Visual Representation of Vision, Mission and Goals!*

An interactive learning map was created as a visual representation of DTCC's mission, values and goals. This dynamic learning map has an engaging metaphor that is fun and intuitive for all users. It provides new as well as current employees a comprehensive understanding of the history and future of the company.
